

SEAMetal Portable

Portable Seam Inspection
for CTS and Mobile Canning

SEAMetal 6.3 for Windows 10

All benefits SEAMetal has to offer but in a compact, portable form factor.

The latest version of SEAMetal offers features like Microsoft Excel integration, zoom-in, automatic email alerts, network connectivity, Windows 11 support, a new customizable reporting system. You can now see the image better and get a more accurate measurement than ever before, all for a competitive price.

The software also comes with SEAM doctor!

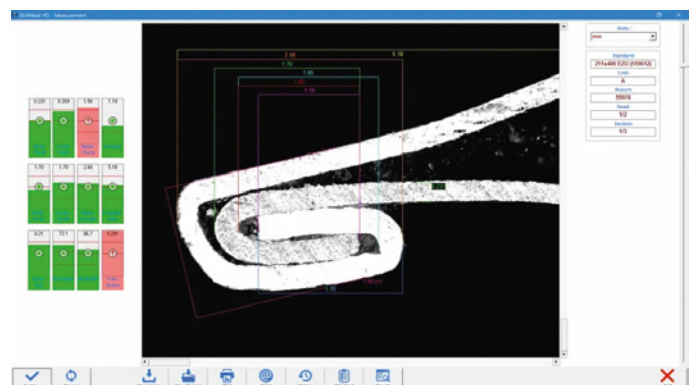

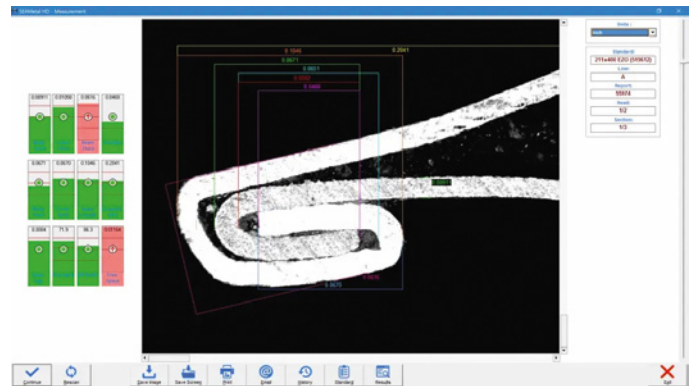

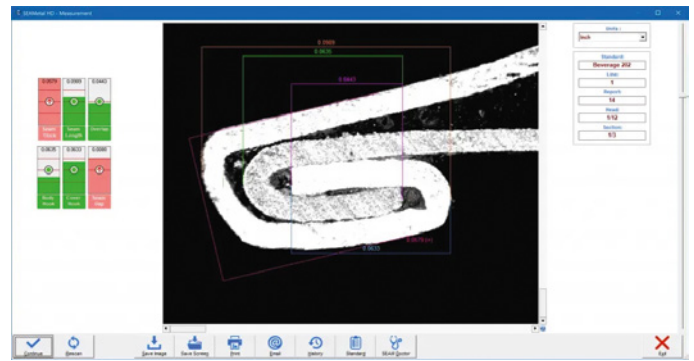

Features & Benefits:

- SeamSchool.com integration works, even when offline!
- Support for Windows 10 and 11
- Support for tablets with multi touch support (zoom, pan)
- Completely redesigned for supporting new wider screens
- External gauges can be connected and included in case
- Each measurement can be measured automatically (less than 1 second per image), manually or configured to use an external caliper or gauge
- Tight integration with Excel for automatic, customizable reports
- True thickness option for accurate double seam thickness analysis, without requiring external calipers or gauges!
- Adaptive detection algorithm – improves accuracy by training detection system with hard-to-detect double seams
- Multilingual! Translations available to most languages!
- Network support – allows secure access to other SEAMetal HD systems through the network, as well as remote report viewing through local and remote network
- Customizable reports
- Supports rechecks – in situations where seamer adjustments were performed
- Supports undo to avoid operator mistakes
- Communicates with any SPC data collection system
- SEAM-explorer™ allows R&D teams to inspect any radius, angle, distance or area within the double seam!
- External gauge support (e.g., countersink can height, flange width, double seam thickness, double seam length and more!)
- Optical unit is portable, complete with portable saw!
- CE certified!
- Pre-focused, Pre-installed
- Optional gauge attachments (e.g., Countersink gauge, thickness gauge)
- Competitive upgrades for seam inspection systems from other manufacturers!

Technical Specification:

SKU:	420 500:00 Single Seametal portable
	420 500:00/3 Seametal portable including STG, PTG and CDG
Applications:	Beverage Testing, Food Can Inspection, Double Seam Inspection, General
Materials:	Metals
Enclosure:	Stainless Steel and Anodized Aluminum
Resolution:	0.0005" (0.01mm) or better
Interface:	USB 2.0
Centering device:	Variable (depending on can type)
Optical units:	Call for details
